

“S&B’s PMs keep our equipment up and running, day after day.”

– Ben Davenport, TimberTech

“I would highly recommend S&B’s services!”

–John Sheely, Western Digital

“Stelter & Brinck always goes above and beyond the call. I rely on S&B to provide me with the best service!”

– Randy Corns, 3-Sigma

Did You Know?

Did you know that the key to operating process heat equipment at optimal efficiency is to regularly perform maintenance on your combustion equipment?

Operating process heat equipment at its optimal level through maintenance will:

-Reduce Downtime

-Increase Production

-Reduce Fuel Costs and Energy Bills

-Reduce Emissions

-Improve Safety

-Increase Equipment Life

-National Fire Protection Association, FM, and Gap (IRI) code compliance

-Improve Profitability

Call Now and Save!

*In order to begin taking advantage of the cost-saving benefits listed above, call 513-367-9300 and ask about our PM program, or our “**Scheduled Burner Maintenance Program**”.*
